MSP MANDATORY REPORTING SERVICES

In response to new MSP mandatory reporting requirements, the experts at Hamlin and Burton have developed a streamlined process and efficient system for completely meeting our clients' MSP reporting obligation. Via CHaRT® (Claim Handling and Reporting Technology), required data is captured, claimant Medicare eligibility is queried, and required reporting is submitted on behalf of our clients. We are providing a cost effective and industry best MSP mandatory reporting service. The RRE registers and provides requested information. We take care of the rest.

We provide:

- Direction through the registration process
- Account set up on the COBSW
- Account set up in CHaRT®
- Customized electronic data bridge with the COBSW to send and receive information, including testing
- Required MSP data fields and functions added to CHaRT®
- Monthly Medicare Beneficiary Queries
- Required automatic submission of all Quarterly Claim Input Files
- Automatic retrieval and update based on COBC response
- Incorporation of new requirements into the claim management policies and procedures.

Hamlin & Burton provides Claims Management and required MSP mandatory reporting for all of your liability and no-fault claim needs.

Please contact one of Hamlin and Burton's MSP Specialists at (407) 332-0022 or MSPReporting@hamlinandburton.com.
